## Long Bio Version (~ 175 words)

Chandramouli Kandukuri is the Chief Technology Officer at Gov2Biz Inc., where he has led technology strategies and product innovation since 2016. With nearly 20 years in technology, he builds AI-powered, cloud-native software that helps government workflows while improving the experience for both staff and the communities they serve.

Chandramouli brings a rare mix of deep technical grounding and real public-sector context. Earlier in his career, he worked inside government as a Senior Software Engineer at the Office of Consumer Credit Commissioner for the Government of Texas, which shaped his practical approach to building systems that can stand up to policy complexity, audits, security requirements, and day-to-day operational constraints. Earlier, he built war simulation systems at CAE Inc. across India, Canada, and the United States, helping militaries prepare for combat in varied terrains and climates.

At Gov2Biz, he is known as a calm, hands-on leader who turns complicated compliance rules into clear product and engineering decisions. He sets a high bar for reliability, security, and scale, and he cares just as much about usability and adoption as he does about architecture. Just as importantly, Chandramouli is a mentor who invests in people, building teams that take ownership, ship with discipline, and keep outcomes front and center.

He speaks on responsible AI in government, cloud modernization, and what it takes to deliver trustworthy, mission-critical technology in regulated environments.

## Short Bio Version (~ 50 words)

Chandramouli Kandukuri is Chief Technology Officer at Gov2Biz Inc., leading technology strategy and product innovation. With nearly 20 years in software engineering, he builds AI-powered, cloud-native platforms for government operations. A mentor and advisor, he is known for translating complex compliance into secure, scalable solutions.

## GovTech forum version (~100 words)

Chandramouli Kandukuri is Chief Technology Officer at Gov2Biz Inc., where he has shaped technology direction since 2016. With nearly 20 years in software engineering and architecture, he builds secure, cloud-native platforms that modernize government operations.

His work has enabled agencies to digitize operations across finance, liquor, marijuana, and agriculture, collecting billions of dollars while serving millions of citizens. Before Gov2Biz, Chandramouli worked inside government as Senior Software Engineer at the Office of Consumer Credit Commissioner for the Government of Texas, giving him practical insight into operational constraints and compliance demands. He is known for setting high engineering standards, mentoring teams, and delivering reliable technology in high-stakes environments.

## Technical forum version (~130 words)

Chandramouli Kandukuri is Chief Technology Officer at Gov2Biz Inc., leading engineering for AI-powered, cloud-native SaaS that handles licensing, permitting, and regulatory workflows at scale. With nearly 20 years spanning software engineering and architecture, he has delivered systems that process billions of dollars in government transactions while maintaining security, auditability, and uptime.

Before Gov2Biz, he worked as Senior Software Engineer at a state regulatory agency, and earlier built war simulation systems at CAE Inc. for military training across diverse terrains. He focuses on practical AI adoption in regulated environments, designing for reliability under compliance constraints, and building engineering teams that ship with discipline and accountability. Chandramouli speaks on cloud modernization, trustworthy AI, and what it takes to sustain mission-critical technology in government.

## Indian associations version

Chandramouli Kandukuri, “Chandra”, is CTO at Gov2Biz Inc., where he has led technology strategy and product innovation since 2016, building secure, cloud-native and AI-enabled solutions for government licensing, permitting, and regulatory

operations. With nearly 20 years in technology, he is known for combining deep engineering discipline with a practical, people-first leadership style.

Beyond his professional work, Chandra is deeply engaged in strengthening the community in San Antonio. He has supported initiatives such as Diwali San Antonio, IASA, and Hello Diwali by helping shape promotional strategies and bringing thoughtful technology into cultural events to increase participation and improve the attendee experience. He is passionate about creating spaces where traditions are celebrated, diverse communities connect, and newcomers feel included.

Through his involvement in festivals, gatherings, and cultural showcases, Chandra helps amplify San Antonio's cultural richness and encourages broader participation across communities and geographies.

## Indian Origin ICP Podcast

Chandramouli Kandukuri, "Chandra", is CTO at Gov2Biz Inc., where he leads the design of AI-powered, cloud-native platforms that simplify licensing, permitting, and regulatory work for government agencies. He is known for a practical approach to innovation, building solutions that are secure, compliant, and citizen-centric, with outcomes teams can measure.

With roots in India and a career built across the United States, Chandra brings a global builder's perspective to every decision. From early hands-on engineering to technology leadership, he has stayed focused on shipping reliable systems that earn trust, especially in regulated environments where security, auditability, and uptime are non-negotiable. Chandra likes making complex topics feel simple and usable. Whether it is technology decisions or team leadership, he shares real lessons on mentoring and building trust so teams can execute well, even under pressure.
